Interpretation of Commonly Used Transportation Terms in International Transportation

In the international trade of ordinary ocean shipping, we need to understand all the costs involved so that we can calculate the price for door to door.

1. Logistics cost from factory to departure port
2. Departure port fee (the cost for apply to the customs, documentation fees and so on)
3. Ocean freight
4. Insurance fee
5. Destination port fee (Unpacking, collecting container and other expenses)
6. Agent fee (Help you handle customs clearance, documents and customs clearance)
7. Destination country tariff
8. Logistics cost from destination port to client's warehouse
9. Some hidden fees (according to the policy of the customs department of each country)
